HOW IT WORKS

YouTube for kids is exclusively designed for children. All you have to do is download it, and it is compatible with iPhones and iPads. It is child-friendly, however you will still need parental guidance. This is very easy to use; it is split into four sections. They are: music, learning, explore and shows.

FACTS YOU WILL NEED TO KNOW:

- It is built with a timer so that it can limit your child from watching too much.
- The parents can limit the children by preselecting videos that appear on home screens.
- It is also compatible with Android versions.
- The features are well designed.
- The app will alert the children about session completion.
- They can learn about the latest technology as well.
- The videos are created by the kids' fairy tale imaginations.
- It is a kid-friendly portal that provides the best videos.
- The families can tune into parental controls.
